

TECHKON Service

Service offer for the measurement devices TECHKON DENS, SpectroDens, SpectroJet, SpectroDrive and SpectroPlate

We take special care to ensure, that TECHKON measurement devices are working properly according to strict specifications and international standards.

To be assured of the proper condition of your measurement device we recommend to have it checked every 24 months in the TECHKON Service-Center. The manufacturing date of your device is printed on the last page of the manual.

Service offer

The 24 months device check for the products DENS, SpectroDens, SpectroJet, SpectroDrive and SpectroPlate is a complete service package and includes the following tasks:

- Cleaning of the instrument
- Checking of charging capability
Exchange of battery if necessary and disposal of old battery (applies only to battery-powered devices)
- Checking of the measurement illuminant and exchange if necessary
- Checking of the absolute white standard
- Device calibration
- Upload of new firmware
- Complete functionality test
- Issuing an ISO-compliant test- and manufacturer-certificate

How it works

Please send the device together with all accessories preferably within the device case to the address shown below. Please include the coupon from the bottom of this page.

After receiving the device we will inform you about the expected repair time. Should you require a replacement unit during the repair time, please contact us in advance. We will check if we have a unit on loan available, which we can send to you.

Prices

DENS	€ 160,-
SpectroDens	€ 380,-
SpectroJet	€ 480,-
SpectroDrive	€ 590,-
SpectroPlate	€ 290,-

Prices are excluding VAT and shipping charges and are valid from January 01, 2019.

If additional service and spare parts are required, we will issue a detailed estimate of costs for your approval before proceeding to repair.

Your TECHKON service team will be happy to answer any further questions.

Please include this coupon with the device shipment.
